# Go handmade

quality design in a unique style

Yarn universe

- for you who knit and crochet

# Welcome to Go handmade

My name is Hanne, and I am the founder of Go handmade. In this catalog, my little team and I would like to talk about our wool and yarn and show you some of the projects, beautiful results of our work.

I like to pretend that the wool in itself is magical, especially when used in knitting or crochet patterns. Who doesn't know of the tremendous joy touching yarn and dreaming of exciting projects – the therapeutical comfort when getting engrossed with needles or hooks in hands – see everything take shape. The pleasure of knitting or crocheting to please others often is at least as intense. Yes, for many persons it even is the highest quality of life – I am not exaggerating when I say that it is very important for the personal wellbeing.

May own late Mother in Law has knit gorgeous creations for our son. He had elegant sweaters right from the time he was born. For me it had a huge impact to have had a Mother in Law in whose life knitting played a big role.

Towards the end of her life, my Mother in Law's knitting wasn't without little errors, however she knit with such passion that it highlighted the importance of being able to continue creating with her hands. It is a handmade luxury article, made with joy and love, entirely unique.

The little cardigan I am showing on this page – it was knit by my Mother in Law during a period of time with health issues – but despite this, she insisted on continuing to knit. This little cardigan will forever remain a precious memory of my Mother in Law's knitting and her love for yarn and the recipients. Handmade articles are of extraordinary importance and maybe especially when it is not perfect.

I would like to tell you that my team and I hope that this catalog highly inspires many people. We have put great efforts in it, and we certainly realise that it often seems to be easy on pictures. However it is absolutely certain that this catalog was proudly made by very engaged people. All of us wish you to be inspired looking through this catalog.

Best regards,

***Hanne Tolberg***

# THE WORLD OF YARN

With our presentations, we want to help ensure needlework remains relevant in the future and contributes to countless good times. A world where it will be much more exciting and sustainable to create your own, in creative processes that are so good for the soul and in the spirit of immersion and therapy.

## Silky and Sustainable

# TENCEL BAMBOO

Tencel is an ecologically sustainable organic material, made from wood chips primarily from beech and eucalyptus trees. The trees are FSC certified and the wood chips originate from the natural thinning of forests and as byproducts of other timber production.

**Uniqueness**
This yarn, made of silky soft and smooth Tencel and bamboo fibers has a very delicate thread, indeed unique and fascinating to work with. The thread might be spun looser in some spots of the yarn, which is a natural part of its character. The result will be so gorgeous.

Children will love this yarn as it is incredibly gentle and soft against the skin.

## Soft and light

# SOFT BAMBOO

The yarn contains as much as 70% of bamboo, which adds an amazing softness and a special lightness to the yarn. Comfortable against the skin, so indeed a very child friendly product. The texture is silky with a beautiful drape.

Bamboo is the fastest growing plant in the world and thus a great source of sustainable production. Bamboo releases more oxygen than any other plant and is grown without the use of pesticides.

23% cotton and 7% acrylic add a good shape retention to the yarn.

# PARTY "DELUXE" GLITTER, PARTY & COLOURS

Party „deluxe" is a real gala yarn and/or "running along" accent yarn. The thread is woven with the tiniest small and smooth sequins playing with the light and in some cases, create the most gorgeous glitter effects, like a diamond catching a sun ray.
The yarn is surprisingly easy to knit or crochet, and its softness makes the project enjoyable and exciting.
