Soft Bamboo "fine"

- a Bamboo yarn out of the ordinary

The yarn contains all of 70% of bamboo, which gives the yarn the softest experience and a special lightness. Comfortable to the skin, it makes it also very child-friendly. The texture is silky with a beautiful drape.

Bamboo and environment - Bamboo is the fastest growing plant in the world and thus a great source of sustainable production.

Bamboo releases more oxygen than any other plant and grows without the use of pesticides. 23% cotton and 7% acrylic help to stabilize the soft bamboo and give the thread a good shape retention. Machine washable.

GUIDE:

The sweater is knitted in a front and a back piece, bottom up. Knit back and forth, starting with a rib – then a simple cable pattern following a chart. The well described chart is worked with a cable needle.

The sleeves are in the same pattern, increasing on the sides to increase the arm width.

The shoulder seams are sewn together, picking up sts at the neckline.

Finally, the arm and side seams are sewn together.

Good to know

Needle Size + Tension

Knitters knit very differently: some knit with a needle size 2,0 mm and obtain the same size of design quality as a person who knits with a needle size 4,0 mm. We owe this knowledge to the team of knitters who join us.

The key to knit a specific size is a lot about the knitting style/hands/skills, rather than the size of needles.

Therefore, we will recommend a range of needle sizes.
